REISSUE APPLICATION DECLARATION BY THE ASSIGNEE

Docket Number 9209-4

I hereby declare that:

My residence, post office address and citizenship are stated below next to my name.

I am authorized to act on behalf of the following assignee: Sidel, Octeville sur Mer, France, and the title of my position with said assignee is: Vice-President.

The entire title to the patent identified below is vested in said assignee.

Name of Patentee(s): Dominique Briere, Le Havre ; Léon Coisy, Saint Martin du Manoir ;
Paul La Barre, Sainte Adresse ; Pascal Santais, Le Havre, all of France

Patent Number: 5,968,560

Date Patent Issued : October 19, 1999

Title of Invention: **BLOW MOLDING DEVICE FOR PRODUCING
THERMOPLASTIC CONTAINERS**

I hereby claim foreign priority benefits under Title 35, United States Code, § 119(a)-(d) or § 365(b) of any foreign application(s) for patent or inventor's certificate, or § 365(a) of any PCT international application which designated at least one country other than the United States of America, listed below and have also identified below any foreign application for patent or inventor's certificate, or of any PCT International application having a filing date before that of the application on which priority is claimed.

I believe said patentee(s) to be the original, first joint inventor(s) of the subject matter which is described and claimed in said patent, for which a reissue patent is sought on the invention entitled

BLOW MOLDING DEVICE FOR PRODUCING THERMOPLASTIC CONTAINERS

the specification of which

☒ is attached hereto.

☐ was filed on as reissue application number
and was amended on

(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 C.F.R. § 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

- ☐ by reason of a defective specification or drawing.
- ☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.
- ☐ by reason of other errors.

At least one error upon which reissue is based is described as follows: The original patent is believed to be defective because the original claims are believed to claim less than the patentee has a right to claim. No claim in the original patent is directed to the mold shells standing alone or to a method of producing containers, both of which are believed to constitute patentable subject matter. New Claims 27-33 are presented to overcome these defects. In addition, upon reviewing the original patent applicant became concerned that others might attempt to construe the original claims to include limitations directed to support structure of the molding machine in addition to the shells and shell holders. Accordingly, new Claims 15-26 are presented in the reissue application to resolve any doubt as to the subject matter that applicant is entitled to claim.

All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant.

I hereby appoint the practitioners associated with the Customer Number provided below to prosecute this application and to transact all business in the Patent and Trademark Office connected therewith, and direct that all correspondence be addressed to that Customer Number.
